

(Unclassified // FOUO)

CSWC Operational Period Summary

1800 January 06 2018 to 0600 January 07 2018

In 1943 the State of California purchased 925 acres of Castle Rock Springs property from the Castle Rock Mineral Springs Bottling Works, which was the beginning of Castle Crags State Park in the Shasta Cascade region, Shasta County. The granite spires are more than 170 million years old and the state park offers a variety of camping, picnicking, hiking, and fishing opportunities.

- None reported.

WEATHER OF CONCERN

Weather of Concern

Northern California:

- A significant winter storm will impact the area Monday - Tuesday with widespread rainfall, mountain snow, and breezy winds.

Southern California:

- The first significant storm system is expected to move into Southern California Monday into Tuesday. The highest rainfall intensities are expected Monday night into Tuesday, when there is a threat of thunderstorms. During this time, peak rainfall rates of one half to one inch per hour will be possible. which will bring an increased threat for flash flooding and debris flows in the recent burn areas, including the Thomas, Creek, and La Tuna burn areas.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

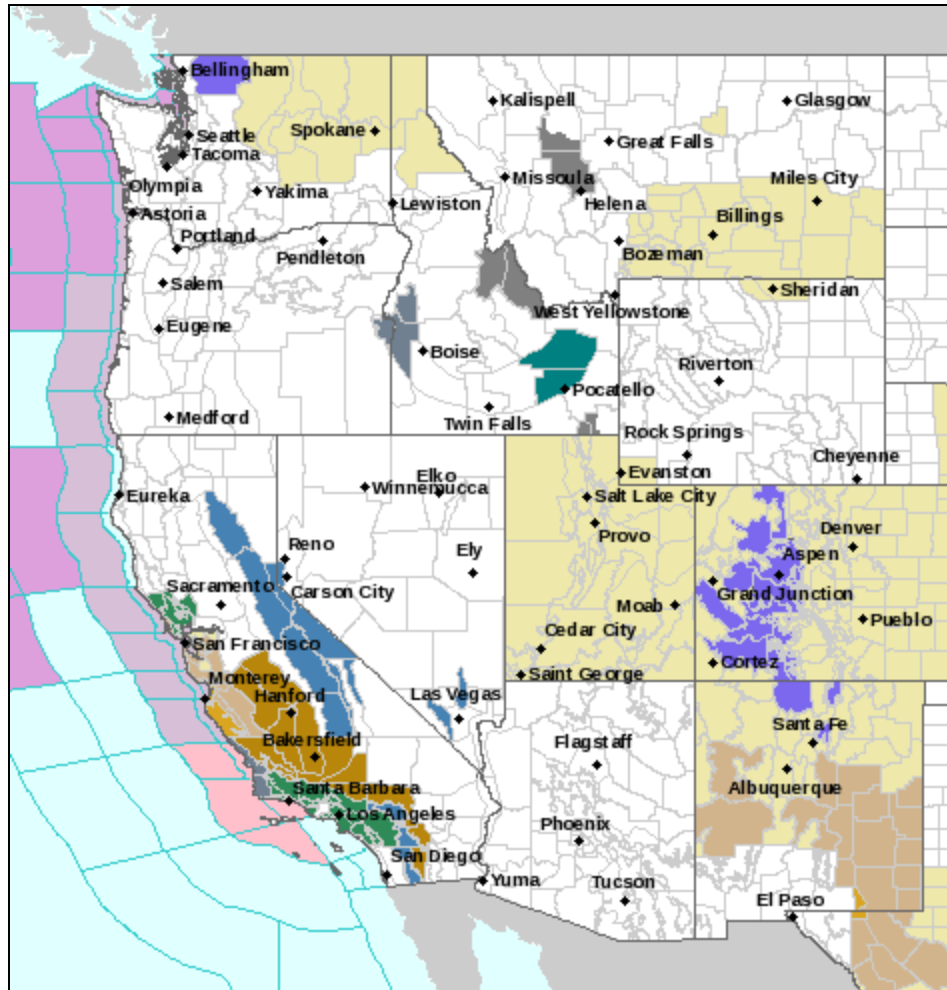

NORTHERN CALIFORNIA

Lingering moisture from yesterday's system and clearing skies has lead to the formation of fog across the valleys this morning. Expect the area of fog to become more widespread by daybreak with patches of dense fog. Drivers should be aware and prepare for rapidly changing visibilities. Upper level ridging shifts east today ahead of storm system brewing in the Pacific. This will allow for one more day of dry weather with clouds beginning to stream into the area throughout the day. Afternoon highs should be fairly similar to Saturday.

SOUTHERN CALIFORNIA

Dry and mild weather is expected through tonight. A strong storm system will bring significant rain with the possibility of debris flow across the recent burn areas, mountain snow, gusty winds and a slight chance of thunderstorms to the area Monday into Tuesday. Gusty northerly winds are likely behind the system by Wednesday with a diminishing shower threat. High pressure will bring dry weather with offshore flow and a warming trend to the region late next week.
